SPECIAL USE PERMITS PROGRAM
P.O. BOX 25112
SANTA FE, NEW MEXICO 87504
505-476-8064 Fax 505-476-8133

Pursuant to regulation (19 NMAC 35.7) the species importation list shall be maintained, updated or amended by the Director as species information and concerns are identified.

The list contains a variety of species for quick reference and public awareness.

Each importation group is represented by a roman numeral in the left column.

Importation groups are defined as follows:

- Group I** - Species importation list group I are designated domesticated animals and do not require an importation permit;
- Group II** - Species importation list group II may be for live non-domesticated animals that are not known to be either invasive or dangerous and do not present a known risk to the health, safety or well-being of the public, domestic livestock or to native wildlife and their habitats.
- Group III** - Species importation list group III may be for live non-domesticated animals that present minimal or manageable concerns that will require specific provisions that must be met prior to issuing an importation permit to address health, safety or well-being of the public, domestic livestock or to native wildlife and their habitats.
- Group IV** - Species importation list group IV may be for live non-domesticated animals that are considered dangerous, invasive, undesirable, state or federal listed threatened, endangered, C.I.T.E.S. appendix 1 or a furbearer. The importation of these species are prohibited for the general public but may be allowed for, scientific study, department approved restoration and recovery plans, zoological display, temporary events/entertainment, use as service animal or by a qualified expert.

Note: any species of live non-domesticated animal not currently on the species importation list will be designated group IV until such time as another determination is made by the director.
